We are your local I.T. department!

Our business department techs have all gone through the HIPAA Certification Program.

If you allow people to work on your computer or network that are not HIPAA certified, then you are not in compliance with the current HIPAA federal regulations. We can help you get in compliance with the right virus protection, business class routers with built in firewalls and the right network security protocols to get you in compliance right away. All of our techs are professionally background checked and have been with us for years.

We service many practices from physical therapy, dentists, urgent cares, internal medicine, eye care and many more. We can offer references from many of today's top doctors so you feel comfortable choosing us as your local I.T. solution. We work hand in hand with many of the top medical software companies and can be your savior by dealing with them for you.

When it comes to service we have 2 fully stocked stores, 2 full times staffs, 3 onsite trucks, a separate business department, retail and hardware departments, remote support department and phone support specialists. Service with our company is always prompt, professional and courteous.

Give us a call today and we can setup a free onsite evaluation. We will take the time to show you how easy it is to get into compliance and you will always have the support you need when you need it.
